

13/05/2026 – CactusLab setup – shared workflow

Cactus Lab Shared Workspace Setup

- Established GitHub repository for collaborative work
 - Both users can now push/pull changes automatically
 - Obsidian vault syncs between devices via Git
 - Auto-pull script runs every 5 minutes
- Moved from Google Drive to GitHub-based system
 - All project files now centralized in shared repository
 - Includes sessions, clients, legal/admin, operations folders
- Tested bidirectional sync successfully
 - Updates from both users appear in shared vault
 - Real-time collaboration now functional

Technical Implementation Details

- SSH key authentication configured for both users
- Obsidian Git plugin installed and configured
- Automated workflow established:
 1. Git pull before sessions (grabs latest updates)
 2. Work in shared vault during session
 3. Auto-push after wrap-up commands
 4. Partner's machine pulls new commits automatically
- Claude integration maintained for both users
 - Wrap-up commands now update shared repository
 - Session notes automatically sync between devices

Current Cactus Lab Structure

- Sessions: 8 documented meetings
- Clients: Active client management
- Legal/Admin: Business documentation
- Operations: Process documentation
- Branding: Visual assets and guidelines
- Invoice system integrated

Work Distribution Strategy

- Abdulrahman: Full context access to entire vault
- Both users can work simultaneously on different files
- Established soft rule: avoid editing same files concurrently
- Mobile access maintained through GitHub sync

Obsidian Sync Consideration

- Discussed \$10/month Obsidian Sync subscription
- Decided GitHub solution sufficient for current needs
- May revisit paid sync for enhanced real-time features

Business Development Discussion

- Current status: 1 paying client
- Year-end goal: 5 paying clients (need 4 more)
- Revenue projections require bank notifications for business account
- Discussed equipment investments once client base grows

Next Steps

- Friday meeting scheduled to discuss:
 - Specific work roadmap and task distribution
 - Claude Agents exploration for automation
 - Website functionality improvements
 - Mobile responsiveness fixes
- Continue testing shared workflow in practice
- Organize remaining vault files into shared structure
